Bolt, Nut Gasket Kits

Advanced Exhaust Solutions full face gaskets are designed for high temperatures service conditions, featuring a vermiculite/fiber facing mechanically bonded (without adhesives to burn off) to a tanged steel core. Rated for 1800°F this gasket can survive where graphite and other materials will fail. Nut and bolts are SAE Grade 5, zinc plated, for increased clamping load capacity and exceptional corrosion resistance. Available with 304SS or 316SS hardware. Kits are fully customizable with your choice of bolt length, bolt pitch, washer type (split lock or flat) and nut type (regular or locknut).
